

Saginaw Public Schools Office of Student Nutrition

September 22, 2021

The Office of Student Nutrition would like you to know that we are experiencing some major supply chain issues when trying to secure products for meals for our students. There are many national shortages right now. We are working to order products to make sure our students are eating well-balanced meals every day. Please expect to see menu substitutions, different products being used to serve the meals in, or on, and perhaps a variety of choice because we are not able to get enough of the same items. Product shortages include but are not limited to: lunch trays, plastic ware, plates (paper or foam), chicken products, whole grain products, buns and breads, condiment packets, pizza, breakfast items, etc. We will do our best to update menus when we are aware of the changes. Thank you for your patience and understanding as we work through these challenges.
